# STRENGTH

## IN NUMBERS

### INNOVATION

**15+ Y** OF CLINICAL USE  
*RIGHT FROM THE START*  
and still innovating

**FIRST**  
TO OFFER REVERSE  
AUGMENTS

**1<sup>ST</sup>** TO MARKET  
with biomechanically  
designed humeral  
reconstruction  
system

**2** MAJOR  
product launches  
per year

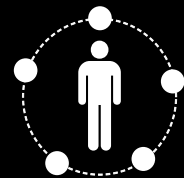

**FIRST AND ONLY**  
orthopaedic company to globally  
launch navigation for shoulder

**>1 in 3**

Equinnox<sup>e</sup> shoulders navigated  
using ExactechGPS<sup>®</sup>

**30%** **YR**  
COMPOUND ANNUAL  
GROWTH RATE **YR**

### CUSTOMER FOCUS

**SOLUTIONS FOR 100%**  
of shoulder arthroplasty  
procedures, from  
straightforward to challenging

**90%**  
patients report doing "better"  
or "much better" after TSA<sup>11</sup>

### MEDICAL EDUCATION

**2000+**  
SURGEONS EDUCATED  
in cadaveric trainings

### RESEARCH DEPTH

**160+**  
PEER-REVIEWED  
JOURNAL ARTICLES

11,000 PATIENTS  
**35**  
CLINICAL SITES

ExactechGPS  
**2<sup>o</sup>** accuracy  
surgeons guided within 2mm of  
implant placement and 2° of version/  
inclination compared to their plan<sup>1</sup>

Fracture Stem  
**83%**  
healing rate of the  
greater tuberosity<sup>2</sup>

**10%**  
notching<sup>3</sup>

**1.5%** combined scapular  
and acromial  
fractures<sup>4</sup>

Reverse  
**0.5%**  
instability<sup>5</sup>

**78%**

convertibility  
Platform Stem<sup>6</sup>

aTSA wedge  
augment preserves<sup>8</sup>

**3X**  
IMPROVEMENT  
in external rotation post-op<sup>7</sup>

**98%**  
& **85%**  
improvement  
in initial fixation<sup>10</sup>

**89%**

more bone  
than a standard  
glenoid

**51%**

more bone  
than a step  
design

**@4Y**  
**4X**

reduction in aTSA  
glenoid radiolucent lines  
(cage vs all-poly)<sup>9</sup>
